

Scott Simpson
Partner

As Director of Information Technology at Cambria, Scott develops the infrastructure and systems to deliver online human resource management and talent development applications and tools to our clients as well as the computing infrastructure for Cambria's internal systems. Scott has been instrumental in setting up our current web application platform and developing our survey, development planning, coaching management and assessment center applications. He manages our fault-tolerant computing platform to ensure reliable and scalable delivery of hosted systems to our clients. Scott also oversees our multi-lingual online survey capabilities and the ongoing management of the "Best B-Schools" and Executive Education surveys for *BusinessWeek*.

Prior to Cambria, Scott was a project manager in the UK Ministry of Defence, where he designed and implemented planning and data-gathering applications as a member of the multinational project management team for Europe's largest defense project. Scott was previously a project management consultant to BlueCross BlueShield, where he developed and maintained the plan for a nationwide medical claims processing system and a major overhaul of their provider data management process.

Scott holds a B.Eng. degree from Nottingham University, England and an MS in Information Technology from Harvard University.
